Neuron Bundle 14: Text Anarchy

Create a stunning array of unique text animations

Whether you're adding visual background noise, using text as a texture, or flashing words to reinforce a theme, text is an important element of your composition. Choose from preset paths, particle arrays, and Matrix-style patterns: Text Anarchy will generate the coolest effects while giving you fine typographic control. Also includes the Geomancy Shapes plug-ins.

Highlights

Rich animations with particles

With particle plug-ins designed for text, you can move text in grids, lines, spirals, or other paths to create simple or complex effects. Randomness sliders add natural variations, while built-in alpha channel generation makes compositing easy.
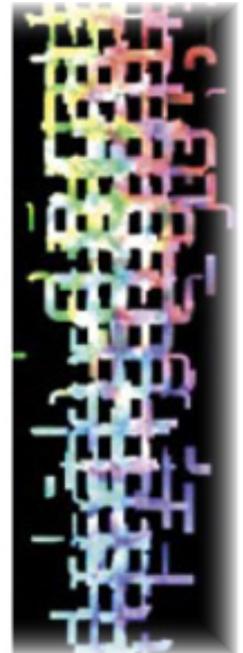

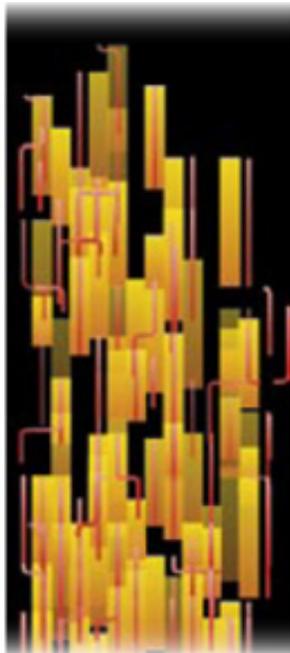

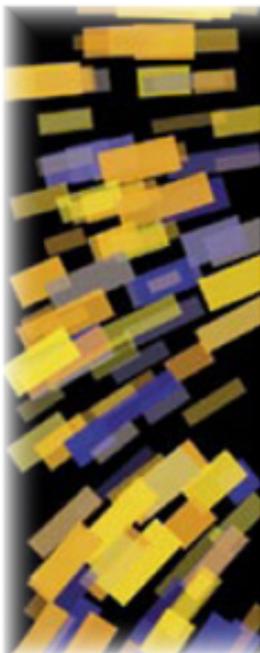

Text anarchy plug-ins give you pinpoint control over font size, kerning, tracking, leading, hinting and baseline shift — features seldom seen outside layout applications. Animate between different fonts, or scroll type across a screen.

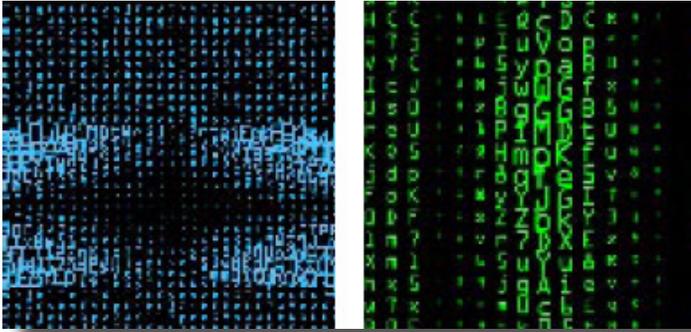

Geomancy Shapes plug-ins included

For creating backgrounds and patterns of all kinds, Text Anarchy includes the Geomancy plug-ins for animating lines, squares, circles and other shapes in 3D space.

Features

Key-frames Not Required

Unlike text animation in most applications, Text Anarchy does not require you to set and adjust key-frames.

Add Randomness

Most controls have randomness sliders to add natural-looking variation.

Animate Individual Letters

Give each letter its own path, or add effects like Blur, Color and Scale.

Scrolling Text plug-ins

TypeOn and ScreenText plug-ins make generation of scrolling text easy.

Text, Eight Ways

Text Anarchy includes the Cool Text, Font Changer, Screen Text, Text Grid, Text Hacker, Text Matrix, Text Spiral, and TypeOn plug-ins.

Includes Geomancy Plug-ins

The Geomancy particle system contains Grid Lines, Grid Squares and Hair Lines plug-ins.

Includes Anarchy Toolbox Filters

Two toolbox filters are also included in the package, including Smooth Tiler and Gradient.

About VDS

VDS provides automation and content design tools for the broadcast, cable television, internet, and post production markets. VDS products automate broadcast television systems, with an emphasis on graphics-related operations, content and digital asset distribution, graphics and promo automation, and internet-to-broadcast systems. These products are used in sports, news and financial broadcast channels as well as in multichannel broadcast and cable facilities. VDS content creation products are tools that deliver graphic design, universal file translation and integration capabilities for the post product and broadcast markets.
