

Neuron Bundle 16: Trapcode 3D Stroke

Create glowing, swirling shapes and lines, then fly through them!

With 3D Stroke, paths, logos or lines can take on lives of their own: glowing, tapering, and moving in complex ways through 3D space, while a built-in camera lets you capture the action from any angle. It's broadcast TV's secret weapon for animated logos and sophisticated write-on effects.

Highlights

40 Preset Shapes

Preset shapes such as stars, grids, and more than ten kinds of squiggles give you pre-drawn starting points for compelling animations.

3D Stroke's UI gives you pinpoint control over shapes, colors, thickness, feathering, start and end points, and offset. More controls are available for looping and repeating movement, motion blur, and opacity.

Flexible, powerful controls

Built-in camera

You get controls for setting clipping planes, controlling camera position, rotation and zoom, and even an auto-orient feature to make sure your objects are always in the center of the camera's view.

Features

Fast 3D rendering

Speedy 3D rendering is perfect for HD motion graphics.

High-Quality Images

Features both 8-bit and 16-bit support.

Motion Blur

Add motion blur to your strokes for a more realistic effect.

Create Dynamic 3D Content

3D Stroke has its own built-in 3D camera.

Endless Repetition

Use the repeater to generate additional strokes that can be uniquely defined.

About VDS

VDS provides automation and content design tools for the broadcast, cable television, internet, and post production markets. VDS products automate broadcast television systems, with an emphasis on graphics-related operations, content and digital asset distribution, graphics and promo automation, and internet-to-broadcast systems. These products are used in sports, news and financial broadcast channels as well as in multichannel broadcast and cable facilities. VDS content creation products are tools that deliver graphic design, universal file translation and integration capabilities for the post product and broadcast markets.
