

Neuron Bundle 16: Trapcode Starglow

Give ordinary highlights a dazzling, sparkling effect!

Starglow is a fast-rendering multi-directional glow effect. It can be used to create multi-colored star shaped glints like those created by a camera filter. Each customizable glow consists of up to eight directions, and each direction can be assigned an individual color map and streak length offering endless possibilities.

Highlights

Powerful presets

Twenty-nine spectacular and popular presets include Aura, Romance, Mars, Chemistry, or Electric. Each of these presets can be fully modified by the user, with individual controls for eight directional points, color maps, shimmer, complex gradients, and streak length.

Dazzlings reflections

Simulate dazzling stars or reflections of light on water by using Starglow on clips of the sky or on real or simulated water. Any bright highlights in the clip will be accentuated in Starglow, to dazzling effect. As seen on the Discovery Channel, Toyota Scion commercials, and countless music videos.

High-quality rendering

Get professional results with 16-bit support on Quantel. Render times measured in frames per second means there's no downside to quality.

Features

Coloring Options

Numerous coloring options include 3- and 5-color gradients with tweakable coloring presets.

Shimmer and Glimmer

Unique controls to make shimmering lights of all shapes and sizes.

Powerful Features

Built-in transfer modes, thresholds and circular masks combine to create stunning customized effects.

Fast rendering

A palette of scripts lets you apply Starglow in one click with common presets.

User Guide

Extensive documentation with examples and animations.

See It Now

Immediate feedback for any kind of clip.

About VDS

VDS provides automation and content design tools for the broadcast, cable television, internet, and post production markets. VDS products automate broadcast television systems, with an emphasis on graphics-related operations, content and digital asset distribution, graphics and promo automation, and internet-to-broadcast systems. These products are used in sports, news and financial broadcast channels as well as in multichannel broadcast and cable facilities. VDS content creation products are tools that deliver graphic design, universal file translation and integration capabilities for the post product and broadcast markets.
